Driving systemic change on climate
Setting the Terms of Debate

Access the tool

The Transition Pathway Initiative (TPI) is a global, asset-owner led initiative which assesses companies' preparedness for the transition to a low carbon economy. Rapidly becoming the go-to corporate climate action benchmark, the TPI tool is available here.

How investors can use the TPI

The TPI is designed to support investors. Find out how they can use its findings.

Supporters

The TPI is supported globally by investors with over £10.3 / $13.3 trillion combined AUM.

Joint statement between institutional investors on behalf of Climate Action 100+ and Royal Dutch Shell plc (Shell)

Dec 3, 2018

This joint statement has been developed between Royal Dutch Shell plc (Shell) and a leadership group of institutional investors on behalf of the global investor initiative. Climate Action 100+ (CA 100+). The investor engagement with Shell has been led by Robeco and the Church of England Pensions Board and included representatives of Eurenco (the Dutch platform for institutional investors) and the European Institutional Investors Group on Climate Change (RIIC). ItP is on behalf of ABP, the Environmenf Agency Pension Fund (EAPF) and the Universities Superannuation Scheme (USS) have also been active participants.

Introductory comments by the Institutional Investors:

As long-term institutional investors who manage retirement savings and investments for millions of people, we believe climate change to be one of the greatest systemic risks facing society today. We believe comprehensive and effective government policy is necessary to drive change across the global economy. All parts of society have a role to play, not least energy-intensive, publicly listed companies. Any gaps, weaknesses or delays in climate change policies and responses will increase the risk to society’s ability to limit global average temperature to well below 2°C above pre-industrial levels in accordance with the Paris Agreement on climate change. Failure to act may also increase the cost of adaptation as well as the physical risk posed by climate change to society and our investments.
As Washington debates carbon fee, one oil giant is opposed but another is silent; what’s that about?

BP CLAIMS TO SUPPORT TAXING CARBON, BUT IT’S SPENDING $13 MILLION AGAINST AN INITIATIVE THAT WOULD DO JUST THAT
What’s to Come…
Thank you
